UK Performance Networking

Is your organisation best in class?

UK Performance Network gives you transparency on how your organisation is performing and helps you make the necessary changes to become the best you can be!

Our Approach: Performance Improvement, not Performance Comparison

Healthcare organisations are under increasing pressure to improve quality of care while maximizing resources and ensuring patient safety. All organisations should be striving for best practices and top performance regardless of their position in national rankings.

UK Performance Network brings an unparalleled service that melds facilitated discussions on benchmarks and process practices with powerful analytics that provide performance transparency against peer, national, and international measures specific to healthcare organisations.

HCS and Mede International have partnered together to provide:

- Benchmark Measures Built on Real Operational Data not just CMDS
- Timely Updates of Data to Make Relevant Business Decisions
- Easy to Access Online Reporting and Analysis to Patient-level
- Process Benchmarking Thought Leadership
- Facilitated Performance Improvement Seminars
- Education and Training Sessions that Facilitate Learning of Best Practices
- Industry Expert Reports and Analysis on Key Measures.

Our approach starts with real operational data over and above CMDS from NHS organisations. Our team of 150 healthcare data experts cleanse and aggregate client data on a frequent cycle to build benchmark measures on key clinical, operational and financial topics. By leveraging the power of online On-Demand Analytics, clinicians, commissioners and managers can measure their organisation's performance against a standard or custom peer group, national, and world class targets.

To make process improvements actionable and to promote best practices, industry experts, executives from top organisations, and research teams provide leadership, training, network events, and in-depth studies on important themes driven by your priorities. Through a personalisable web portal, UK Performance Network subscribers can gain access to their research and online benchmarks whenever they like.

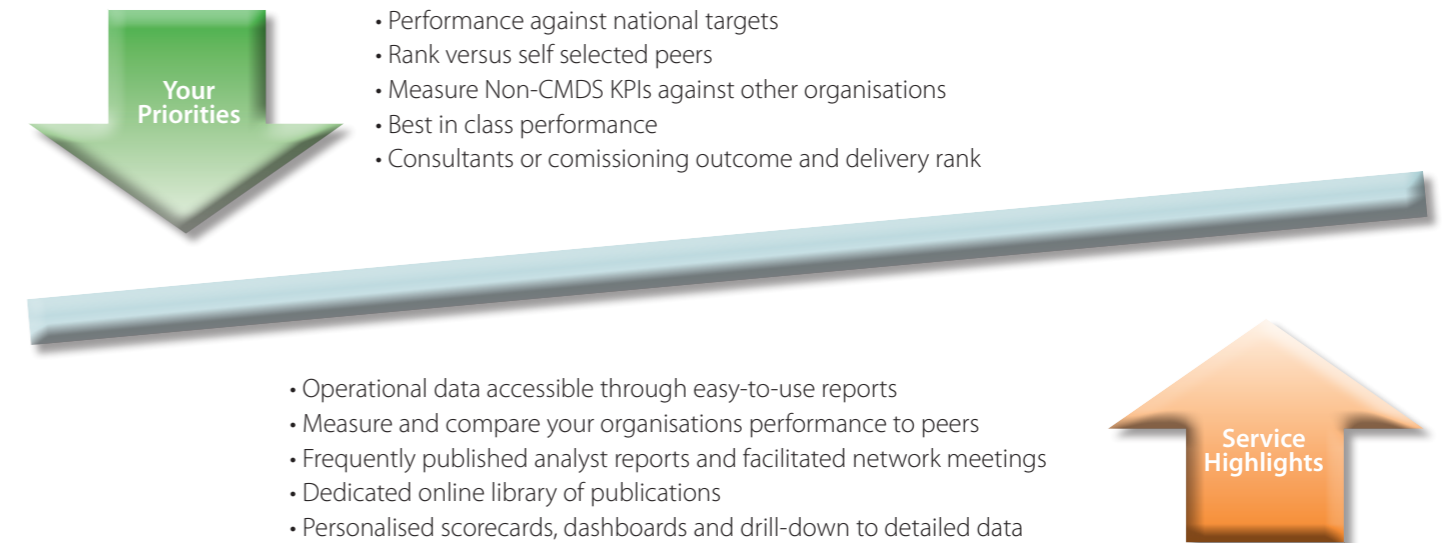

We believe you will find this offering unlike any other industry measures you have seen. The success of this service is our end goal in helping you make improvements.
