Introduction to digital transformation

# Introduction to digital transformation

Explore what digital technology is and how it can transform healthcare services.

Brand new for 2022!

This course looks at the concept of digital transformation, digital technologies and the benefits of implementing successful change. It also explores how by focussing on value, patients and the wider NHS can benefit from digital transformation.

**This course is aimed at the following job roles:** Clinical and medical, finance staff, new to the NHS

**Subject areas:** Digital, information and decision-making

**Topics included in the course:**

- The challenges facing the NHS
- Digital transformation: the context and meaning in the NHS
- The key types of digital healthcare technologies
- Benefits
- Features of effective implementation.

**This course has been produced in partnership with Health Education England and is available for FREE to all NHS staff and is available on the ESR.**
