

BPP University have developed the MBA in Healthcare Finance in response to the scale of the financial and operational changes in the NHS. Financial acumen alone is no longer enough. There is now an increasing need for professionals who understand the need for quality of service and people management in addition to financial information.

This bespoke programme will enable the learner to have a more in-depth understanding of their organisation to better influence at a higher level of management. The final stage in your journey of academic excellence, the MBA Healthcare Finance builds on your existing knowledge and experience in the field of healthcare business management.

Part three

Project and Change Leadership 15 credits

After studying this module, you will:

- Evaluate a range of project and change leadership theories and illustrate how successful change is achieved
- Have in-depth understanding of the process of project and change leadership
- Develop the ability to critically analyse the project and change leadership competencies in successful leaders
- Understand the importance of communication and leadership in a change project

On successfully completing this module, you will be able to:

- Critique leadership concepts and theories in order to put forward strategies to facilitate successful project and change leadership.
- Critically assess the options for change, and communicate recommendations for implementing a change project plan
- Demonstrate the ability to plan and evaluate both continuous improvement and one-off transformational change
- Demonstrate effective decision making even in the absence of complete information
- Demonstrate reflective thinking about your own leadership style

Strategic Management 15 credits

After studying this module, you will:

- Evaluate and contribute to the strategic management of an organisation.
- Evaluate the competitive position of an organisation
- Translate strategy into organisation action
- Understand the importance of Corporate Social Responsibility, Governance, Business Ethics and Technology
- Experience of strategy in action through participation in a business strategy simulation.

On successfully completing this module, you will be able to:

- Research and analyse the structure and development of the healthcare and other industries
- Evaluate the strategic position and performance of an organisation
- Evaluate the resources and capabilities of an organisation in relation to its competitors
- Evaluate strategic direction and options for an organisation
- Develop strategies that are both ethical and sustainable

Healthcare Consultancy Project 30 credits

After studying this module, you will:

- Identify contemporary issues in healthcare management
- Integrate theories and concepts drawn from different subject areas
- Develop and implement strategies in data collection, analysis, synthesis and building well-structured arguments
- Develop writing and communication skills
- Develop personal judgment, initiative and personal management skills

On successfully completing this module, you will be able to:

- Demonstrate the knowledge of theory and the ability to apply it in the context of healthcare
- Exercise appropriate judgment in the planning, selecting and collecting of evidence
- Generate recommendations which will contribute to business success
- Communicate complex information succinctly, effectively and appropriately via different forms
- Develop problem-solving competencies
