

Healthcare
Costing
for **Value**
Institute

Member benefits

Institute members are NHS healthcare providers or commissioners

The Institute provides a members' platform for support and ideas exchange. Belonging to the Institute will enable you to learn from and develop relationships with other organisations facing the same challenges as you, in an environment that encourages feedback to better inform the national agenda.

- 4 free delegate places at every online Institute event*
- Access to a minimum of 5 webinars and exclusive member access to recorded webinars and written summaries
- Full access to all Institute resources, with around 350 pieces of content including:
 - Cutting edge case studies
 - Sector specific PLICS toolkits
 - Value Challenge projects
 - Presentation slides from every Institute event to date
 - Over 100 videos from speaker sessions and key speeches around costing and value
- Networking with a combined audience of senior clinicians, senior finance and costing practitioners
- The opportunity to feedback to regulators directly, influence national decision making and steer the direction of travel for costing and value
- Influence and guide the Institute programme through thought leadership
- Request webinar sessions*
- Opportunity to supply content for the monthly Institute newsletter sent out to all Institute member contacts
- Propose and participate in value roundtable discussions*
- The opportunity to share your own successes and findings with a national audience
- Networking opportunities with Institute associates and partners

*Subject to terms, availability and Institute consultation and approval

National events

- Annual costing conference
- Symposium
- Costing revolution summit
- Value masterclass

Regional events

- 2 x Introduction to costing events
- Costing Together

Online access

- A minimum of 5 webinars
- Newsletters and blogs
- New publications (including case studies, briefings and toolkits)

Access 350 pieces of content

- Case studies, videos, webinars, papers, toolkits, pilots and more

Healthcare
Costing
for **Value**
Institute

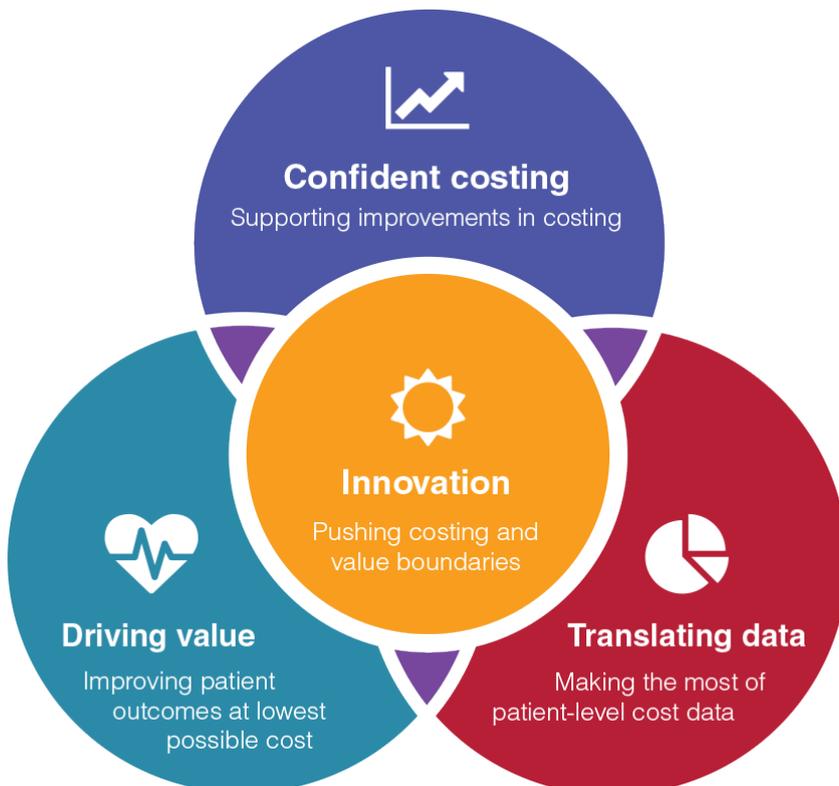

About us

The concept of 'value' in healthcare – maximising the outcomes which matter to people at the lowest possible cost – is increasingly seen as a key lever for supporting the delivery of high quality sustainable healthcare. The challenge is how to do this in practice – both at an organisational and system level with the move to more integrated care for local populations.

The Institute supports the NHS to improve costing, turn data into powerful patient-level information, champion multi-disciplinary engagement, and ultimately drive value across patient pathways.

It is hard to argue against the theory of value-based healthcare – it needs to become the focus for clinicians and finance alike as they look to deliver high-quality sustainable healthcare services.

We support our members to implement patient-level costing and deliver value-based healthcare through our four key themes:

“The Value-Based Healthcare framework requires, at its foundation, accurate, transparent, and actionable measurements of outcomes achieved and total costs incurred for treating a patient’s medical condition. The Healthcare Costing for Value Institute has created an environment that will empower NHS staff to transform healthcare delivery from volume to value.”

Robert S. Kaplan
Senior Fellow and Professor,
Emeritus at the Harvard Business School

Michael E. Porter
Bishop William Lawrence University
Professor at the Harvard Business School
