The HFMA has produced this map of health inequalities policy and data from across the four nations of the United Kingdom. It brings together key national guidance and data with useful resources to support NHS finance professionals.

As the NHS seeks to tackle the health inequalities brought into sharp focus by the Covid-19 pandemic, it is vital that NHS finance staff are able to support their organisations through the use of good quality data and evidence.

Aimed primarily at NHS finance professionals in both provider and commissioner organisations, this map provides a quick reference guide to key guidance documents, national statistics and data focusing on specific areas of health inequality.

There is a vast amount of information available to support work to tackle health inequalities and this map cannot include it all. However, the items included cover key areas and provide references to other useful sources.

This map supplements HFMA's existing *NHS efficiency map*, *Covid-19 guidance map*, *Mental health guidance and resources map* and *NHS corporate governance map*.

Please e-mail policy@hfma.org.uk with any links to further guidance or resources that may be helpful to include.

National policy documents

The underpinning strategies that support national work to tackle health inequalities

Links to guidance	Last updated
ENGLAND <i>Public Health England: Addressing health inequalities through collaborative action</i> approach to health inequalities and the action that can be taken to address them. Links to various national frameworks and tools.	September 2021
NORTHERN IRELAND <i>Department of Health: Making life better</i> a whole system strategic framework for public health 2013-2023.	June 2014
SCOTLAND <i>Scottish Government: Public health priorities for Scotland</i>	June 2018
WALES <i>Public Health Wales: Measuring the health and well-being of a nation</i> public health outcomes framework for Wales.	March 2016
WALES <i>Public Health Wales: Placing health equity at the heart of the Covid-19 sustainable response and recovery</i> report focusing on the wider effects of the pandemic on a range of issues including: poverty, deprivation and social exclusion; unemployment, education and the digital divide; harmful housing and working conditions; and violence and crime.	March 2021
WALES <i>Public Health Wales: Rising to the triple challenge of Brexit, Covid-19 and climate change for health, well-being and equity in Wales</i> examining a range of factors that will be impacted by the three challenges, including health, economic, social and security, mental wellbeing, environment and access to, and quality of services and highlights how this 'triple challenge' will impact on the health behaviours of the population.	October 2021

Broad health inequalities' data

Reports and data sources that cover several areas of health inequality or review the national picture

Links to guidance	Last updated
UNITED KINGDOM The Health Foundation: <i>Evidence hub: what drives health inequalities?</i> source of health inequalities data across money and resources; work; housing; and transport.	August 2021
ENGLAND Office for National Statistics: <i>Health inequalities</i> current patterns and trends in ill health and death by measures of socio-economic status.	October 2021
ENGLAND Public Health England: <i>Public health outcomes framework</i> trends in public health including wider determinants and life expectancy, with data available to local authority level.	February 2021
ENGLAND Institute of Health Equity: <i>Fair society, healthy lives (the Marmot review)</i> report from an independent review to propose the most effective evidence-based strategies for reducing health inequalities in England. Link includes economic cost analysis.	February 2010
ENGLAND Institute of Health Equity: <i>Marmot review 10 years on</i> review of progress in the context of deteriorating population health and widening health inequalities since 2010.	February 2020
ENGLAND Institute of Health Equity: <i>Build back fairer – the Covid-19 Marmot review</i> the pandemic, socioeconomic and health inequalities in England.	December 2020
ENGLAND University of York: <i>The costs of inequality: whole-population modelling study of lifetime inpatient hospital costs in the English National Health Service by level of neighbourhood deprivation</i>	May 2016
NORTHERN IRELAND Department of Health: <i>Health inequalities annual report 2021</i> a comprehensive analysis of health inequality gaps in Northern Ireland.	May 2021
SCOTLAND Scottish Government: <i>Long-term monitoring of health inequalities</i> annual update of the long-term monitoring of health inequalities headline indicators.	January 2021

WALES NHS Confederation: *Making the difference: tackling health inequalities in Wales* suggested actions for the Welsh Government to tackle health inequalities.

April 2021

National indices of deprivation

Indices of deprivation are relative measures that describe national deprivation of each small area when compared with the rest of the country

Links to guidance	Last updated
<p>UNITED KINGDOM Consumer Data Research Centre: <i>Index of multiple deprivation – interactive map</i> an interactive map providing small area measures of relative deprivation across the whole United Kingdom, using the indices of multiple deprivation from the four nations.</p>	<p>October 2020</p>
<p>ENGLAND Ministry of Housing, Communities and Local Government: <i>English indices of deprivation 2019</i> the indices of deprivation (IoD2019) are a suite of 39 separate indicators across seven domains: income; employment; health deprivation and disability; education, skills training; crime; barriers to housing and services; and living environment. The weighted seven domains form the index of multiple deprivation (IMD2019)</p>	<p>September 2019</p>
<p>NORTHERN IRELAND Northern Ireland Statistics and Research Agency: <i>Northern Ireland multiple deprivation measure 2017</i> a relative measure of multiple deprivation across seven domains: income deprivation; employment deprivation; health deprivation and disability; education, skills and training; access to services (formerly proximity to services); living environment; and crime and disorder (NIMDM2017)</p>	<p>November 2017</p>
<p>SCOTLAND Scottish Government: <i>Scottish index of multiple deprivation 2020</i> a relative measure of deprivation across seven domains: income; employment; education; health; access to services; crime; and housing (SIMD2020)</p>	<p>April 2020</p>

WALES **Welsh Government: *Welsh index of multiple deprivation 2019*** a relative measure of deprivation across eight domains: income; employment; health; education; access to services; housing; community safety; and physical environment (WIMD2019)

About the HFMA

The Healthcare Financial Management Association (HFMA) is the professional body for finance staff in healthcare. For over 70 years, it has provided independent and objective advice to its members and the wider healthcare community. It is a charitable organisation that promotes best practice and innovation in financial management and governance across the UK health economy through its local and national networks.

The association also analyses and responds to national policy and aims to exert influence in shaping the wider healthcare agenda. It has particular interest in promoting the highest professional standards in financial management and governance and is keen to work with other organisations to promote approaches that really are 'fit for purpose' and effective.

The HFMA offers a range of qualifications in healthcare business and finance at undergraduate and postgraduate level and can provide a route to an MBA in healthcare finance. The qualifications are delivered through HFMA's Academy which was launched in 2017 and has already established strong learner and alumni networks.
